

Make It Visible

TWO 45 MINUTE
MEETINGS AT LEAST
A WEEK APART

Authored by Susan Jurow, Bill Penuel, & Leah Peña Teeters

Activity, Results, and Aims

Aims

01. To identify an artifact with your team that was designed collaboratively
02. To make visible the diverse forms of activity that are involved in the successful implementation of the designed program

Activity Summary

This activity involves codifying the explicit and implicit and visible and invisible labor that is required to implement a shared template to document the emotional, temporal, and physical infrastructure required to support the activities. If you have documented their activities, they will work together to generate a robust picture of the

Rationale

This activity draws upon the concept of articulation of labor. The successful implementation of a program is made possible by a constellation of factors, including explicit, implicit, tangible, and intangible human activity. Collaborators in making visible the emotional, temporal, and physical infrastructure required to support the activities
