Class requirements

The class meets Tuesday and Thursday from 12.45pm to 2pm. You are required to keep up with the weekly course readings and come to class prepared for lectures and the discussion of material with your classmates.

Assessment

Your final grade will be based on the following assessments: class preparation (30 percent); problem sets (30 percent); and exams (40 percent).

Class preparation: We will discuss about ten papers during the semester. Please read the assigned paper each week and come to class prepared for discussion. To help you organize your thoughts, please prepare a summary of the paper of two pages or fewer and submit the summary for assessment. In your summary, you will need to state the research question, explain why the question is important to industrial organization (and economics in general), briefly explain the estimation approach and data, and outline what you think

I are the most interesting aspects of the paper. See page 8 below for specific guidance. I will collect all your summaries during the semester and randomly grade seven. The lowest scoring summary will be dropped from your final grade.

Problem sets: You are required to complete one problem set about every two weeks for a total of seven during the semester. The lothe

Readings

General references

The course will help you develop the empirical skills needed to research interesting questions in industrial organization and related fields, e.g., energy, trade, transport. I assume that you have the appropriate micro and econometrics skills to complete the course. The following general references will help you refresh your knowledge and skills where necessary throughout the course.
